

I am writing the FCC to urge you to protect and enforce Title 2 for Net Neutrality. I teach 9th grade English at a young and struggling charter school. I teach scholars from schools that have either failed them academically or closed altogether. A large portion of my school's student body have special needs, and rely on alternative systems to participate. Ending the Title 2 protections for Net Neutrality will severely put an immense economic strain on our school and ruin scholars' chances to work and research from home. Having a platform where users from every background and socio-economic status can create and debate is essential to ensuring a better future for our youth. Please continue Obama's legacy with regards to Net Neutrality under Title 2.
